EQUATIONS INVOLVING ADDITION

1 $y + 6 = 9$

2 $x + 3 = 1$

3 $-3 = a + 4$

4 $14 + m = 20$

5 The sum of a number and 3 is -2. Find the number.

5 Three more than the product of a number and 4 is 15. Find the number.

6 Five less than three times a number is 1. Find the number.

7 The product of 2 and a number is increased by 9. The result is -17.

Directions:

Print pages 1&2, 3&4 (5&6 , 7&8 for the answer key) front to back. On my printer, I use the option to **print double-sided and to flip along the short edge**. If you print single-sided and then photocopy, you must manually flip pages 2 and 4 before placing them in the copy machine.

Line up the bottom of the two pages as shown:

Fold over the top portion and secure with a few staples.

The final product should look like this:
